PROFESSIONAL SUMMARY

Junior DevOps Engineer with hands-on project experience in Linux, Docker, AWS EC2, Nginx, Git, GitHub and CI/CD. Experienced in containerizing applications, deploying web applications to cloud infrastructure, configuring web servers and troubleshooting Linux-based environments. Seeking an entry-level DevOps opportunity to apply my technical skills, contribute to a professional engineering team and continue growing in cloud infrastructure and automation.

CORE SKILLS

DevOps & CI/CD: Docker, Docker Compose, GitHub Actions, CI/CD Fundamentals

Cloud: AWS EC2, AWS Security Groups, Cloud Infrastructure Fundamentals

Linux & Systems: Ubuntu Linux, Linux Command Line, Users & Groups, File Permissions, Processes & Services

Web & Networking: Nginx, HTTP Fundamentals, TCP/IP Fundamentals, Port Mapping, Basic Network Troubleshooting

Version Control: Git, GitHub, Branching, Commits, Remote Repositories

Web Technologies: HTML, CSS, JavaScript

PROJECT

Personal Portfolio — AWS EC2 Deployment

Personal DevOps Project | AWS EC2 · Linux · Docker · Nginx · Docker Compose · Git · GitHub

- Developed and containerized a personal portfolio website using Docker and Nginx.
- Deployed the application to an AWS EC2 Linux server.
- Configured Security Groups, SSH access, and Docker port mapping.
- Managed and troubleshot the deployment using Linux and Docker CLI.
- Used Git and GitHub for source-code management.

EDUCATION

OND, Marketing

Kwara state Polytechnic — Ilorin, Nigeria | 2014

CERTIFICATION

DevOps Engineering Training — Miaztech, 2026
